"NG 333384. Erd House." (1) "On rough, rocky moorland about 400yds (274.0m) W of the junction where the road to Ullinish Lodge branches off from the Dunvegan and Struanmore Road is a partly destroyed earth-house. The surviving portion consists of a straight narrow passage running roughly NE-SW, the side walls formed of good drystone building and the roof of stone lintels covered by about 1' (0.3m) of soil. The gallery measures 18' (5.6m) in length, and where entered at the SW end 4' (1.2m) in height and 2' 7" (0.8m) in width, broadening to 3' (0.9m) 6' (1.8m) farther in. The walls converge inwards slightly towards the top. There are indications that the southern continuation has taken a distinct curve towards the S. The inner end of the structure has possibly taken the form of an oval or circular chamber, as there is a deep hollow surrounded by displaced stones at the end of the passage. This portion is obscure, and there are numerous remains of old houses and enclosures adjoining it." (2) "Earth-house as described by RCAHM."

(OSFI:CFW:10.4.1961) "NG 3333 3846 Earth house." (3) "NG 333 384 KNOCK ULLINISH SOUTERRAIN"

Box 52.

HNG 33 PM 002.

Box 52. "NG 333 385. At Ullinish, situated $\frac{1}{2}$ mile north of Struan is a souterrain. This structure is partly destroyed but what remains is in good order. It consists of a passage going in about 3.9m with an average height of 0.92m and width of 0.9m. The walls comprise blocks of local tertiary basalt and are all dry stone. Lintel stones cover the roof and these are large thin slabs of the basalt lava measuring about 70cms long, 50cms wide and 10 cms thick. The floor is bare earth. The structure has two collapsed areas: the first section and also an oval chamber near the rear."(5)
"See continuation card for illustration."
